

Mediterranean Bath

The Mediterranean bath of the Classic Collection line gives life to a world in which the classic revives and improves thanks to the patented system that offers **heat by radiation** from the wall, reinforced by the **internal stove** and a strong aromatic and visual emotion.

The ceiling dispenser releases an aromatic flow on the heated stones of the stove accompanied by an energetic light, which creates

a warm cloud of steam to favour the diffusion of a **delicate fragrance in the environment**, guaranteeing superior heat quality and constant maintenance relative humidity.

Personalisation also becomes a significant variable, allowing the product to adapt to any context, offering the solution that best fits the place where it will be inserted.
